Driving licence (B)

PROFILE

Aspiring to do fundamental research in supramolecular and synthetic chemistry, with a strong interest in molecular machines, hybrid materials, and nanomaterials.

A portfolio of my scientific projects is available on my website (GitHub).

LANGUAGES

French : native

English : C1

Spanish : basic knowledge

Turkish : basic knowledge

RECENT EXPERIENCES

Tutor in mathematics and physics
Perpignan (66), September 2025 - April 2026.

Volunteer communication Officer for CFE France
Perpignan (66), since October 2025.

Runner for Le petit Chabry
Perpignan (66), August-October 2024, May-September 2025

[Portfolio](#)

INTERNSHIPS

SAMS, ICS, CNRS, Strasbourg

18 May 2026 - 10 July 2026

Supervisors : Dr. Nicolas Giuseppone and Marion Brobecker

Topic : Synthesis and functionalization of ortho-tetrafluorinated azobenzenes for integration into a molecular whirligig. Optimization of a gram-scale multi-step synthesis and purification of ortho-tetrafluorinated azobenzene.

LCPNO, INSA, CNRS (NCO team), Toulouse

04 April 2022 - 6 July 2022

Supervisors : Dr. Simon Tricard and Dr. Sebastien Lledos

Topic : Integration of metallic nanoparticles into low-molecular-weight hydrogels. Synthesis and size control of metallic nanoparticles. Phase transfer via ligand exchange. Preparation of hydrogels and nanoparticle incorporation into the matrix. Collaborative work between several laboratories (LPCNO, IMRCP, LCC).

EDUCATION

University of Strasbourg

2026-2028

Master's degree in Molecular and Supramolecular Chemistry.

University of Perpignan Via Domitia

2025-2026

University Diploma (DU) in English, C1 level.

University of Perpignan Via Domitia

2024-2026

Bachelor's degree in Chemistry, graduated with honours.

University Toulouse III - IUT Paul Sabatier, Castres

2020-2022

University Diploma of Technology in Chemistry, specialization in Synthesis.

TECHNICAL SKILLS

Synthetic Chemistry :

Multi-step reactions monitored by TLC, GC, HPLC and NMR.

Synthesis under classical and inert conditions using Schlenk techniques or glove box, microwave activation, catalysis.

Purification by recrystallization, distillation, liquid-liquid extraction and column chromatography.

Structural identification by ^1H , ^{13}C , ^{19}F , COSY NMR, FTIR, ESI-MS, EI-MS and MS/MS.

Analytical Chemistry :

Separation techniques by GC (FID, UV, MS detection), HPLC (UV, DAD, fluorescence, MS detection), CombiFlash and ion chromatography.

Atomic absorption/emission spectroscopy, melting point, TGA, DSC, XRD.

Sample preparation by Headspace, SPE, SPME, QuEChERS.

Sample preparation and image processing of TEM and SEM analyses.

Software :

Pack Office, ImageJ, Mestrenova, OriginLab, RStudio, ChemDraw, Zotero
